

MOHAMMED SALMAN

Assistant Manager (SAP HANA & AI Solutions) | Enterprise Systems & Innovation Leader

 mohammed.salman7191@gmail.com |  +91 8142 471256 |  Skype: mohammed.salman7191

 Portfolio: <https://salman-mohd-ai-agent.streamlit.app/>

PROFESSIONAL SUMMARY

11+ years of specialized expertise in enterprise SAP HANA administration combined with modern AI engineering and strategic team leadership. Proven ability to lead cross-functional teams, drive digital transformation initiatives, and architect mission-critical SAP systems for Fortune 500 organizations.

As Assistant Manager, directing technical teams in designing, developing, and deploying enterprise-grade AI solutions and SAP infrastructure while mentoring talent and establishing governance frameworks. Track record delivering 4 production-grade AI agent projects, managing 150+ mission-critical applications, and maintaining 99.9% system uptime.

Strategic Focus: Team leadership • Enterprise architecture • Digital transformation • AI innovation • Operational excellence • Compliance & governance • Technical mentorship

CORE COMPETENCIES & TECHNOLOGIES

SAP HANA & Enterprise Systems

HANA 2.0 Administration • ECC 6.0 • System Performance Tuning • Cloud Migration (GCP/Azure) • Disaster Recovery • Database Optimization • Security Administration • User Management • Backup & Recovery • BRTTOOLS Operations • System Monitoring • Capacity Planning

Team Leadership & Management

Team Building & Development • Cross-functional Leadership • Mentorship Programs • Performance Management • Strategic Planning • Process Optimization • Vendor Management • Budget Management • Resource Allocation • Change Management • Stakeholder Communication

AI & Machine Learning Engineering

LLMs (Groq, OpenAI, Gemini) • LangChain Framework • Natural Language Processing (NLP) • AI Agent Architecture • Python Programming • Prompt Engineering • Multimodal AI • Real-time Analytics • Knowledge Base Integration • AI Innovation Strategy

Cloud & Infrastructure

Google Cloud Platform (GCP) • Microsoft Azure • Docker • System Architecture • Infrastructure as Code • Network Optimization • Firewall Management • Load Balancing • Cloud Governance

IoT & Real-time Systems

Sensor Integration (BH1750, Temperature, Motion) • MQTT Protocol • ESP32 Development • Real-time Monitoring • Video Analytics • Predictive Maintenance • Data Pipeline Architecture

DevOps & Agile Tools

Azure DevOps • ServiceNow • Git/GitHub • CI/CD Pipelines • Agile/Scrum • ITIL Practices • Monitoring (Dynatrace, SAP Studio) • Linux/Windows Administration • IT Governance

PROFESSIONAL EXPERIENCE

Deloitte Support Services India Pvt. Ltd.

Aug 2021 – Present | Assistant Manager (SAP HANA Administration & AI Solutions)

- Lead high-availability SAP HANA 2.0 infrastructure supporting 150+ mission-critical applications across 3-tier distributed architecture (3 nodes)
- Direct technical team of 5+ SAP BASIS consultants; mentor talent in cloud architecture, system optimization, and modern AI integration
- Drive cloud migration strategy: Led comprehensive on-premises SAP ECC/HANA to Google Cloud Platform (GCP) transition; managed POC, UAT, and production deployment for zero-downtime migration
- Establish IT governance framework and process standards; implemented ServiceNow service account provisioning with IT compliance protocols
- Oversee business continuity initiatives: Coordinate yearly BCP testing and disaster recovery drills; maintain 99.9% SLA uptime across enterprise infrastructure

- Spearhead AI innovation: Led development of 2 production AI agents (SAP HANA Troubleshooting Agent, Enterprise HANA Admin Assistant) reducing incident resolution time by 60%+
- Implement Active-Active Read Enabled (AARE) configuration for high-availability systems; manage quarterly vulnerability patches and system upgrades
- Execute technical performance optimization (TPO) initiatives; identified memory bottlenecks and optimized database configurations reducing infrastructure costs by 25%+
- Drive organizational knowledge management: Conduct weekly technical deep-dives, establish best practices documentation, and lead system architecture reviews

CTRL S Datacenters, Hyderabad

Sep 2019 – Jul 2021 | SAP HANA Consultant

- Installed and configured high-availability SAP systems: ECC 6.0, S/4 HANA 1610/1709, Solution Manager 7.2 across distributed environments
- Managed system kernel upgrades, revision updates, and OS patching on Oracle DB, ASE Sybase 16.0; ensured zero-downtime maintenance windows
- Configured HANA replication, HANA Studio, ADS services; troubleshoot complex performance issues affecting business operations
- Administered Transport Management System (STMS); configured RFC connections and SAP routers for multi-landscape environments
- Performed system copy operations using SAPinst; managed client exports/imports and migration activities
- Applied SAP patches using SUM tool; maintained system documentation and disaster recovery procedures

Wipro InfoTech, Mumbai

May 2015 – Aug 2019 | Associate Consultant (SAP Basis)

SAP Basis Transition SME & Support for Enterprise Clients | 4 High-Impact Projects

Arvind Lifestyle Brands Limited (May 2016 – Jul 2019)

- Served as primary support focal point for onsite HQ, warehouses, and 2,000+ external users
- Managed SAP ECC 6.0 (EHP4/EHP7), PO, BO, BW on HP-UX, AIX, Windows environments

- On-call incident management for 50+ critical business processes; coordinated with infrastructure teams
- Setup/configured SAP printers and resolved connectivity issues for intranet/extranet
- Configured EWA reports; performed ECC-PO, ECC-BW, ECC-SolMan integrations
- Maintained SAP profile parameters; performed kernel upgrades; managed background jobs

TATA Power, Mumbai (Oct 2015 – Apr 2016)

- SAP Basis Consultant & Transition SME for DR drill and system migration activities
- Completed BW on HANA migration; executed GRC RFC integration for NetWeaver on HANA
- Managed background job scheduling, database monitoring, OSS connections, DVM requirements
- Downloaded and installed HANA patches via HDBLCM cockpit; documented backup strategy
- Analyzed ABAP dumps; performed R/3, OS, and database-level performance analysis

Infinity Retails Pvt Ltd - TATA Group (Aug 2015 – Oct 2015)

- SAP ECC 6.0 (EHP0), CRM, BI, BO, PI administration on AIX and Windows environments
- New store rollout user ID administration; kernel upgrades and support package management
- Configured printers; managed client copy across system landscape; established reorg parameters

State Bank of India (May 2015 – Jul 2015)

- Managed Portal (EP) infrastructure serving 200,000+ users across 20 application servers
- Documented system landscape configurations, RFCs, transport management, and backup strategy
- Performance tuning via EWA report analysis; identified and mitigated landscape risks

AI AGENT ARCHITECTURE & INNOVATION PORTFOLIO

1. SAP HANA Troubleshooting Agent

Tech Stack: LangChain, Groq LLM, Gradio, Python | Status: Production

Engineered AI-powered agent automating diagnosis and resolution of SAP HANA system issues

Reduced manual troubleshooting time by 60%+; integrated with live HANA telemetry

Deployed conversational interface for real-time SAP experts to automate RCA processes

2. Enterprise HANA Admin Assistant

Tech Stack: Python, Azure Cloud, Real-time Alerting, Analytics

Production-grade SAP HANA monitoring assistant with real-time alert analysis and anomaly detection

Automated root cause analysis for performance degradation and system incidents

Integrated with Dynatrace and SAP monitoring tools for intelligent incident management

3. Multi-Modal Digital Clone ("Make My Clone")

Tech Stack: Multimodal AI, Computer Vision, Video Generation, Voice Synthesis

Led end-to-end development of intelligent digital avatars integrating logic, image processing, and video

Implemented voice synthesis and video generation pipelines for realistic digital representations

4. Room Monitoring & IoT Analytics System

Tech Stack: ESP32, MQTT, Python, Real-time Sensors, Analytics Dashboard

Designed and deployed multi-sensor IoT system (temperature, humidity, light, motion) with live monitoring

Built real-time analytics dashboard with predictive alerts and historical analysis

Integrated AI for anomaly detection and pattern recognition across sensor networks

KEY ACHIEVEMENTS & LEADERSHIP IMPACT

✓ 60%+ Efficiency Gain: Deployed AI troubleshooting agent reducing SAP incident resolution time from hours to minutes

✓ 99.9% System Uptime: Architected and maintained enterprise HANA infrastructure for 150+ mission-critical applications

✓ Multi-Cloud Migration Leadership: Successfully led on-premises SAP ECC/HANA to GCP migration; ensured zero-downtime transition

- ✓ Cost Optimization: Identified memory bottlenecks and optimized table spaces, reducing infrastructure costs by 25%+
- ✓ Intelligent Automation: Built 4 production-grade AI agents automating enterprise troubleshooting, monitoring, and analytics workflows
- ✓ IoT Innovation: Designed real-time sensor monitoring system with predictive analytics and automated alerting
- ✓ Team Leadership Excellence: Mentored 15+ SAP BASIS consultants; established mentorship framework and technical certification program
- ✓ Knowledge Management: Led weekly technical deep-dives; created comprehensive system documentation and best practices repository
- ✓ Governance Framework: Implemented IT governance processes and ServiceNow service account provisioning for enterprise compliance

EDUCATION

Bachelor of Technology (B. TECH) – CSIT

Information Technology | Specialized in Enterprise Systems

Professional Expertise:

SAP HANA Administration • Cloud Architecture (GCP/Azure) • AI & Machine Learning • Team Leadership & Management • Python Development • Database Optimization • Disaster Recovery • Enterprise Security • ITIL & Agile Methodologies • IT Governance

ADDITIONAL INFORMATION

Languages: English (Fluent), Hindi (Native)

Location: Hyderabad, India | Open to relocation for UK/European opportunities
